

Docket No. AUS920010059US1

ABSTRACT OF THE DISCLOSURE

**METHOD, SYSTEM, AND PRODUCT FOR EFFICIENT RETRIEVAL OF
INFORMATION RELATED TO DATA INPUT INTO A DATA ENTRY FORM
FROM THE DATA ENTRY FORM**

5

A method, system, and product are described for efficiently retrieving information related to data items input into a data entry form displayed on a client computer system. The client computer system is coupled to a server computer system. The server computer system includes a database of a plurality of data items. Each data item has unique information associated with it. A data entry form is displayed on the client computer system. The data entry form includes multiple fields. Input data is received in one of the fields where the input data is one of the data items. The information which is related to this data item is retrieved from the data entry form without accessing the database on the server computer system. This information is then displayed utilizing the data entry form.
